- 4 hours talk time and 120 hours of standby
- Weighs a mere 11 grams

Box Contents:

- GL Dual G2 Bluetooth Headset
- Ear Hook
- AC Charger
- Additional Ear Rubber
- User Manual

OK, so you've got a new Bluetooth Headset. It's comfortable, the sound quality is good and you didn't pay too much for it. So what's the problem? Not much, except for the fact that people on the other end can't hear you over all the background noise when you're talking to them. That's the problem with most single mic headsets. The GL Dual G2 is designed to solve this problem by filtering out the background noise. How do we do it? Essentially there are two mics on the Headset with a DSP (Digital Signal Processor) onboard. A special algorithm in the headset computes the distance between the sound coming from the two mics and cancels out the sound furthest away (i.e. the background noise) so that people can hear you. So the next time you're at the airport, a noisy coffee shop, or just driving down the road with your window down listening to your favorite tunes remember to wear your GL Dual G2 so that you don't have to hear people say "I can't hear you".
