- Power adapter
- Stereo adapter
- Control button

The G-Lite Bluetooth Stereo Headset is a dual purpose headset that functions as both a stereo headset for high fidelity listening, as well as a communications headset for use with mobile phones and other voice-enabled devices.

Available with a universal Bluetooth audio adapter, the G-Lite Bluetooth Stereo Headset provides immediate wireless compatibility for any device with a headphone jack, such as laptops, home stereos, MP3 players, including Apple iPods, and multimedia devices, such as Sony PSP.

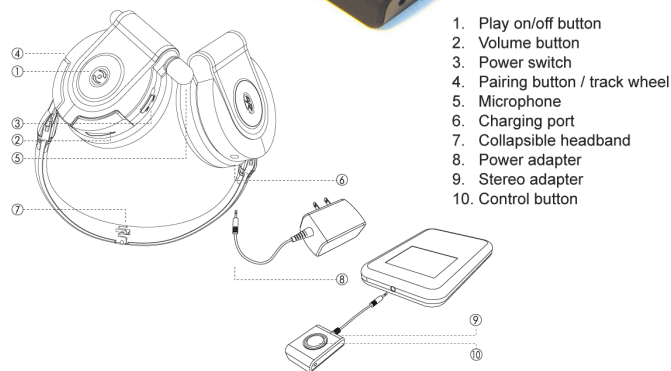

Pause your music and answer an incoming call from your Bluetooth compatible cell phone all with the push of a button located on your headset. Talk through the mic located on the earpiece. One more push of a button on your headset gets you back to your tunes. Volume control on the earpiece allows you to conveniently adjust sound without having to reach for your cell phone or audio player.
